Healing Invisible Wounds

EMORY
HEALTHCARE

Veterans Program

Are invisible wounds of service affecting you? If you suffer from nightmares, are constantly on edge, jump at sudden noises, prefer to stay at home, or have become disconnected from your family and friends, Emory Healthcare Veterans Program is here to help.

The program, which is free to qualified **post-9/11** service members and veterans, features world-leading specialists who treat invisible wounds of military service. Together, we'll chart a course of treatment customized just for you, which will lead to peace of mind and your best life.

Who is Eligible?

Emory Healthcare Veterans Program currently serves service members and veterans from anywhere in the United States who have served at least one day post-9/11 and are dealing with the mental and emotional aftereffects of military service. Warriors are eligible for treatment regardless of discharge status, deployment history, or length of service.

Conditions We Treat

Emory Healthcare Veterans Program takes a collaborative approach to healing, beginning with a comprehensive individual assessment conducted by top specialists in the fields of psychiatry, psychology, neurology, rehabilitative medicine, social work and wellness.

Assessment results map the course for individual care and may include treatment for:

- PTSD (Post-Traumatic Stress Disorder)
- TBI (Traumatic Brain Injury)
- MST (Military Sexual Trauma)
- Anxiety
- Depression
- Substance Use Problems
- Pain

Life-Enhancing Treatment at No Cost

Service members and veterans receiving treatment from the Emory Healthcare Veterans Program incur no out-of-pocket costs associated with care, transportation, lodging or meals. If insured, the program pays any costs not covered by the warrior's insurance. If uninsured, the program pays the entire cost.

Treatment Options

Emory Healthcare Veterans Program offers two treatment pathways. Both are offered in person and via telehealth at no cost to the warrior.

Intensive Outpatient Program

A two-week program that covers the cost of treatment, transportation, lodging and meals.

Traditional Outpatient Program

This option is better suited for those living in close proximity to our clinic and are unable to dedicate two weeks to the program.

Depending on each warrior's customized treatment program, the following services may be provided:

- Therapy (individual and group)
- Virtual reality exposure therapy (VRE)
- Medication/medication education
- Acupuncture
- Yoga
- Stress management skills
- Sleep training/consults/evaluations
- Family services
- Music therapy
- Wellness services
